

What to do if we have a power cut in Ansty

Planning for emergencies is an important job for the professional organisations who respond to incidents, but it is also important for local communities like Ansty to think about how we may be able to assist the emergency services and other responders.

In the emergency event of a power cut:

- ✓ **If you are in immediate danger – call 999**
- ✓ Call Scottish and Southern Electricity (Central Southern England) on **0800 072 7282**. **If not available ...**
- ✓ **105** is the number to call. It is free of charge and will put you through to your local network operator who can give you help and advice. You can call **105** to report or get information about power cuts in your local area.
- ✓ You can also log on to this link: [Power Track](#)

This web page also gives you all the details of how to report a power cut and track where they are in your post code area. (You can phone, email, message and track the faults...)

Of course, if you have a power cut then you may not be able to do most of this! (Which then clearly adds to the confusion!)

However, you can download an **App** from this site for **Apple** or **Android** phones which could be useful – if you can get a signal!! This is not always the case in Ansty! [DOWNLOAD on the APP Store NOW!](#) or go for the [ANDROID APP on Google Play](#) You might be glad of it later. Land Lines often operate during power cuts: sometimes mobiles do not...

Lastly – print this page off – If the power cut is widespread and you have a neighbour or two who might find difficulty accessing this information – then please keep an ‘eye out’ for them!
